

Requirements level network sorted

Requirements level network		
Nr.	Requirement	Short description
1	Information and communication	
1.1	Creation of opportunities for communication and networking and disposing of communication barriers	Free communication and avoiding misunderstandings; reach and release potentials for creativity
1.2	Support of the building of knowledge networks	Stimulate communication, transparency of decisions
1.3	Working together in a cloud	Actuality of the data and simple access
2	Work organization	
2.1	Actuality of the tools	Enabling efficient communication
2.2	Standardization of interfaces	Facilitated communication and avoidance of mistakes
3	Values	
3.1	Openness towards change and innovation beyond company's boundaries	Innovation requires an open attitude; acceptance of ideas and solutions of different sources; learn from other people, to get better yourself
3.2	Trust in collective intelligence of teams	Better decisions
3.3	The product as representation of the company's values	Credible conveying of the company's values
The smaller the number of a topic, the more important is the requirement (e.g. 1.1 is more important than 1.2; but between 1.1 and 2.1 is no difference)
